WORK EXPERIENCE

Fidelity Investments

December 2020 – Present

Software Engineer

Remote

- Led development of end-to-end Angular and Java application to purchase annuities directly from insurance carriers.
- Mentored other developers in front end Angular design patterns and asynchronous programming with rx/js library.
- Developed API's in Spring Boot framework to retrieve annuity quotes, content from CDN, and send sensitive user data to additional services.
- Built Jenkins deployment pipelines utilizing uDeploy, Veracode and SonarQube to ensure code security and quality.

insightSoftware - Tidemark

May 2020 – December 2020

Software Engineer

Raleigh, NC

- Migrated grid panel hierarchy viewer, page edge, slice and cycle selection features to Angular improving performance of grid by 15%.
- Implemented new grid features such as cell exploration and pagination in Angular framework.
- Reduced number of API calls to read/write data on page edge, slice or cycle change - improving grid responsiveness.

LogMeIn - LastPass

January 2019 - May 2020

Software Engineer

Boston, MA

- Drove an increase in conversion rate of 3% for paid services through redesign of UI and in product messaging
- Increased second-week retention of new users by 17% with onboarding interface.
- Implemented role setting for invited users to enterprise accounts, allowing for segmented functionality by user role.
- Improved user preferences storage to synchronize across both web and extension application.
- Developed KPI charts to track key metrics of engineering organization.

Abierto Networks

July 2018 - December 2018

Junior Software Developer

York, ME

- Developed digital signage applications for convenience stores using HTML, CSS, JavaScript and PHP.
- Improved user interfaces by updating menus to be more intuitive, increasing sales of products by 4%.

EDUCATION

University of Connecticut

June 2016

B.A. Communications

Storrs, CT
